

REV:10/2006

The gross or net income eligibility standards for the household size are used to determine the household's eligibility according to the characteristics of the household.

To determine eligibility for households containing a member(s) who is elderly or disabled, or a disabled veteran or surviving disabled spouse/child(ren) of a veteran, the adjusted net monthly food stamp income of the household, computed in accordance with the instructions in Section 1010, is compared to the maximum net monthly income limits for the appropriate household size in Table II, below.

To determine eligibility for all other households:

First, compare the total gross monthly income of the household to the one hundred thirty percent (130%) maximum gross monthly income limit for the appropriate household size in Table I, below;

Second, compare the total net monthly income of the household (after appropriate deductions) to the maximum net monthly income limit for the appropriate household size in Table II, below.

To determine eligibility for the elderly and disabled applying for separate household status, compare the gross monthly income of all the others in the household to the one hundred sixty-five percent (165%) maximum gross monthly income limit for the appropriate household size in Table III, below. Also, the elderly or disabled person/spouse is not to be considered a household member for this purpose. (Includes disabled veterans or surviving disabled spouse/child(ren) of a veteran (see definition in Section 1010.30.05)).
